

HYDRAULIC IMPACT HAMMERS PRODUCT RANGE

DIESEKO GROUP

PILING & VIBRO EQUIPMENT

AN INTRODUCTION TO **DIESEKO GROUP** FOUNDATION EQUIPMENT

Established in 1974, Dieseko Group represents several brands in the foundation equipment industry, in four product lines: Piling Equipment, Piling & Drilling Rigs, Ground Improvement and Power packs. In our markets the company is represented by three brands: PVE Piling & Vibro Equipment, ICE International Construction Equipment and Woltman Piling & Drilling Rigs.

Dieseko Group engineers develop foundation equipment in accordance with the latest regulations. The experienced engineers in the sales and rental department have a profound knowledge of the equipment and are always standby to advise clients on their specific needs. Spare parts are in stock for all machines, which can be shipped quickly to dealers and clients worldwide, to avoid downtime on projects. Service engineers are available 24/7 to support clients on site. With over 60 dealers and branches worldwide, Dieseko Group is a reliable partner for all foundation contractors for consultancy, sales, rental and financing.

HYDRAULIC IMPACT HAMMERS FLEXIBLE AND VERSATILE

PVE recognizes the importance to adapt to changing circumstances during piling, especially when it comes to soil. For this reason the PVE hydraulic impact hammers are designed in a modular configuration. For every hammer type it is possible to adjust the impact energy by adding or removing drop weights from the hammer.

PVE impact hammers are excellent for lots of applications. The most common application is the installation of precast concrete piles. PVE impact hammers are also very suitable for driving steel casing piles, sheet piles and cast-in-situ concrete piles. The larger PVE impact hammers, starting from the PVE 10 NL, are very suitable for heavy piling works. Examples are driving large steel casing piles for bridge foundations, wind farm foundations or industrial projects for jetties, harbour quays and cable landing projects.

MAXIMUM PERFORMANCE WITH MINIMUM GROUND VIBRATIONS

PILE SLEEVES & DRIVE CAPS

For every type of piling works PVE offers a wide range of drive caps and pile sleeves. In case of special projects PVE has the possibility to develop custom made pile sleeves.

PVE drive caps and sleeves are suitable for the following applications:

- Precast concrete piles
- Timber piles
- Steel casing piles
- Steel profiles (H and U beams)
- Steel and concrete sheet piles
- Combined sheet pile walls
- Cast-in-situ concrete piles

ACCELERATED

PVE NL series impact hammers are accelerated to guarantee high performance. The accelerated PVE impact hammers ensure efficient pile driving operations and high production rates. The impact energy is adjustable for an optimal setting in relation to pile type, pile diameter and soil stiffness. The PVE NL series impact hammers are manufactured according high quality standards and with A-brand components. The PVE NL series impact hammers are well known for their long lifetime and high efficiency.

SOUNDPROOF

Especially in urban areas several challenges need to be taken into consideration when it comes to piling works. PVE recognizes the importance of the continuity of piling works while taking the surrounding area and neighbours into account. PVE offers a very sophisticated insulating system for the PVE NL impact hammer range. With the sound insulating system sound reductions up to 10 dB are possible compared to a standard impact hammer. PVE NL impact hammers are continuously subject to further developments for sound proofing and efficiency.

MEASURESTRIKE SYSTEM

Quality and accuracy of your piling works, PVE clearly understands the wishes of the client, their principals and engineers. For this reason we are offering the MeasureStrike system. The MeasureStrike system registers and reports for each pile number pile tip depths, the pile blow energy, pile driving time and blow count. The integrated WiFi application assists the operator in transferring data from the piling operations fast and easy to another device for information exchange. Piling data therefore is available anytime and can be shared within seconds.

HYDRAULIC IMPACT HAMMERS

MODULAR

PVE offers a wide range of hydraulic impact hammers. Because the required capacity of the hammers varies as a result of different pile types, sizes and soil conditions the possibility of adjusting the blow energy is a main advantage. Therefore the PVE hydraulic impact hammers are built in a modular configuration. The PVE impact hammer therefore is easy adjustable by added drop weights in case required. For example a transformation of a PVE 4 NL impact hammer into a PVE 6 NL impact hammer is possible within only a few hours. The modular system is applicable on the complete range of PVE impact hammers.

RELIABLE POWER FROM PILING RIG OR POWER PACK

PVE hydraulic power packs are the best solution when piling rigs need additional power to drive a hydraulic impact hammer or other auxiliaries.

PVE HYDRAULIC POWER PACKS

PVE benefits from more than 40 years of experience in developing and producing hydraulic power packs for the foundation industry. The PVE hydraulic power packs are the most suitable power packs for driving the PVE NL series of impact hammers. Besides that the PVE hydraulic power packs are suitable to drive the most common hydraulic impact hammers from other brands. No need to say that our company group's Voltman piling rigs operate without power packs as the machines drive the hammer directly. The following characteristics are applicable for our impact hammers.

- Available in multiple sizes and various configurations
- Equipped with Tier 4 and Tier 3 engines
- Delivered with normal or biodegradable oil
- Controlled by electronic iQan system for easy operation
- Excellent quality by using A-brand components

HYDRAULIC POWER PACKS

POWER PACK RANGE

For the PVE NL series impact hammers PVE recommends the 250 NL and 500 NL hydraulic power pack. Besides these two types PVE offers a wide range of power packs suitable to drive vibratory hammers, vibroflats, offshore impact hammers, rotary heads, dredging pumps and other auxiliaries. For more information reference is made to the Dieseko Group website or additional brochures.

YOUR BENEFITS

- High reliability and long life duration
- Cost efficient by fast and easy assembly on piling rig
- Fast and easy exchangeable drive caps and sleeves
- High efficiency by accelerated hammers and high frequent blow rates
- Additional sound reduction systems available
- Professional monitoring and reporting by the Measure Strike System
- Adjustable drop weight due to the modular system of the impact hammers

PROFESSIONALS IN THE FIELD

“

The modular system of the PVE NL series hydraulic impact hammers enables the modification from, for example, a PVE 4 NL hammer into a PVE 6 NL within only a few hours. By adding extra drop weight the standard PVE NL impact hammer is adjustable for heavier piling works.

”

“

The PVE NL series impact hammers are very suitable for every application of driven piles. Besides the most common application of driven precast concrete piles the PVE hydraulic impact hammers are also very suitable for driving cast-in-situ concrete piles. Temporary casings can be driven by the PVE hydraulic impact hammer to the required depth and extracted by the piling rig with or without support from a ring vibrator. PVE is also manufacturer of high performance ring vibrators.

”

“

PVE offers large PVE NL series impact hammers suitable for heavy piling works. Large steel casing piles, combined sheet piling walls and offshore mono piles can be driven efficient and fast by the larger impact hammers. Also large PVE impact hammers are built according the modular system which gives the opportunity to increase the impact hammer capacity when required.
